Name
Deb Levy
Question

Both of the landfills were never / built to hold anything. They were never prepared for sanitary or radioactive material, So how can you make them safe? There is a bottom, that is not prepare to hold any kind of waste. There a bottom, that you do not REALLY know what is happening You may say YOUR test shows no leaching, but do you really know what crack it is following and where it really coming up. We do know liquid does find its way submit
